

EXECUTIVE SUMMARY	
Project Overview	
This dashboard analyzes 12,000 Swiggy food delivery orders to evaluate business performance across revenue, customer satisfaction, restaurant performance, delivery efficiency, and payment behavior. The objective is to identify key operational trends and provide actionable business insights that support data driven decision making.	
KPI	Value
Total Orders	12,000
Total GMV	₹1.20 Cr
Swiggy Revenue	₹26.35 L
Average Rating	4.80 ★
Average Delivery Time	36.6 min
Cancellation Rate	6%
Business Insights	
1. Revenue Performance	
Hyderabad generated the highest revenue among all cities, indicating a strong customer base and higher order volumes compared to other markets.	
2. Cuisine Performance	
Fast Food emerged as the highest revenue-generating cuisine, followed by Cafe and Healthy Food, suggesting strong customer demand for quick-service meals.	
3. Restaurant Performance	
Burger King was the top-performing restaurant by revenue, followed by Subway, KFC, and Domino's, highlighting the dominance of established quick-service restaurant brands.	
4. Delivery Operations	
Average delivery time increased significantly during rainy weather, indicating that weather conditions have a measurable impact on operational efficiency.	
5. Customer Experience	
An average customer rating of 4.80/5 reflects consistently high customer satisfaction across the platform.	
6. Payment Behaviour	
Digital payment methods accounted for the majority of transactions, demonstrating a strong customer preference for cashless payments.	
Business Recommendations	
Increase marketing campaigns in Hyderabad and Jaipur to maximize revenue growth. Expand partnerships with high-performing restaurants such as Burger King and Subway. Improve delivery fleet allocation during rainy weather to reduce delivery delays. Continue promoting digital payment offers to strengthen customer retention Invest in fast-food restaurant partnerships, as this category contributes the highest share of revenue.
